DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 14-65, drawn to a heparanase protein having at least 70% homology to SEQ ID NO: 10 (human placenta), classified in class 435, subclass 209.
- II. Claims 14-65, drawn to a heparanase protein having at least 70% homology to SEQ ID NO: 14 (human SK-hep1), classified in class 435, subclass 209.
- III. Claims 14-65, drawn to a heparanase protein having at least 70% homology to SEQ ID NO: 44 (mouse embryo), classified in class 435, subclass 209.

It is acknowledged that each of claims 14-65 have been grouped into the above three different groups. The claims will be examined to the extent that they are drawn to each of the different groups.

Claims 14-33 and 44-65 link(s) inventions I through III. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 14-33 and 44-65. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if

Art Unit: 1652

any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I through III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different heparanase inventions each comprise a chemically unrelated structure capable of separate manufacture, use and effect.

Because these inventions are distinct for the reasons given above and the search required for Groups I through III is not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Application/Control Number: 09/776,874

Art Unit: 1652

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
